

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Curriculum & Professional Electives Guide 2026-2027

Section 1: Semester V Core Courses

Semester V core courses include: CS501 Database Management Systems (4 Credits), CS502 Operating Systems (4 Credits), CS503 Theory of Computation (3 Credits), and CS504 Artificial Intelligence (3 Credits).

Section 2: Professional Elective Track I (AI & Data Science)

Elective options under Track I: CS-E01 Machine Learning (3 Credits), CS-E02 Natural Language Processing (3 Credits), CS-E03 Computer Vision (3 Credits), and CS-E04 Deep Learning Architecture (3 Credits). Prerequisites for NLP: CS504 AI.

Section 3: Professional Elective Track II (Cybersecurity & Cloud)

Elective options under Track II: CS-E11 Cryptography & Network Security (3 Credits), CS-E12 Cloud Computing Architecture (3 Credits), CS-E13 Blockchain Technology (3 Credits), and CS-E14 Penetration Testing (3 Credits).

Section 4: Mandatory Mini-Project Guidelines

All 3rd-year CSE students must complete a mandatory Mini-Project (CS508) carrying 2 credits. Teams of max 3 students must submit project proposals by August 25, 2026 to the Project Coordinator Prof. Ramesh.
